	<ul style="list-style-type: none"> •Temperature -15° to 250° F 	

FEATURES/BENEFITS
<ul style="list-style-type: none"> •Instantaneous Open or Close •O-Ring Sealed Stem •Forged Brass Body •Viton Seat •Made in USA •Guaranteed Quality

The **K2 Series Toggle Valves** are constructed to instantaneously open and close the flow of fluids and gases. These valves are ideally suited for use in gas sampling and analysis systems as well as test equipment.

The K2 Toggle Valves are o-ring sealed to eliminate leakage and maintenance. The o-ring is positioned between the actuating threads and the seat, and seals the closely fitted cylinder to give the lowest possible internal volume and protect threads from contamination.

The standard construction is a forged brass body, brass cylinder, cap and lever, Viton seal, Buna “N” o-ring seal, steel spring, and stainless steel lever pin.

These valves are rated for 200 p.s.i.g. service from -40° to 250° F and is available in the angle and straight pattern, both of which are available for panel or bracket mounting.
